KAAN METE PEKSEN

kaanpmete@gmail.com | www.kmpcodes.com | github.com/kaanmetep | +90 531 361 99 71 | Istanbul/Turkey

SKILLS

- Front-End: HTML/CSS, JavaScript, ReactJS, React Native, TailwindCSS, NextJS, TypeScript
- Back-End: Node.js, Express, SQL, MongoDB, PostgreSQL, Redis, Socket.IO
- Others: Git, Github, Docker, Supabase, Stripe, RevenueCat, Expo, Figma

PROJECTS

- ***KnowUsBetter (React Native, SocketIO) - knowusbetter.app***

KnowUsBetter is a mobile game app for couples and friends who want to get to know each other better. Couples can test their connection by playing real-time challenges together - each from their own device. To create certain types of rooms, users need to purchase in-game coins. The app supports 3 languages: English, Turkish, and Spanish. Built with React Native and NativeWind on the frontend, and Node.js, Socket.IO, PostgreSQL, and Redis on the backend. RevenueCat was used for payment services.

- ***DeepIntoDev (NextJS,Redis,MongoDB) – deepintodev.com***

I built DeepIntoDev as a platform to share my own articles about software development. During development, I focused on SEO optimization and high-quality content, which helped the site gain real users and nearly **100,000** views worldwide. Additionally, I implemented an email-verified newsletter subscription system and set up rate limiting with Redis. Currently, **over +700 developers** worldwide have subscribed to my newsletter.

- ***GoViralFast (NextJS) - goviralfast.co***

GoViralFast is a SaaS where users can edit viral videos and share them instantly on social media, using NextAuth and Supabase for authentication, Supabase (PostgreSQL) as the database, Stripe for payments, and Next.js with Server Actions with TailwindCSS. For video editing, I'm using Cloudinary APIs.

- ***Stark E-commerce (MERN Stack) - stark-ecommerce-front.vercel.app***

I developed this project using React.js and Tailwind CSS for the frontend, and Express along with MongoDB for the backend. The project is an e-commerce website where users can browse products, add items to their cart, and complete purchases. Also, admin users can add products with images, can see orders on their panel.

WORK EXPERIENCE

Radity - *Software Engineer Intern*   07/2025 - 08/2025
- Worked as part of an international team of over 100 people, contributing to software development projects. Focused on building solutions for insurance companies using NextJS, NodeJS, and Java.

eCatalog - *Software Engineer Intern*   04/2025 - 06/2025
- eCatalog is a B2B SaaS with 50+ clients and ₺500M in sales. During my internship, I implemented customer-requested features and significantly improved the UX. I have primarily worked with NextJS and React.

PRESSAN MADENI ESYA SANAYI VE TICARET - *Information Technology Staff*   07/2021 – 09/2021
- I worked as an IT Staff before starting my B.S. Degree. I developed an internal tool to simplify the tracking of cartridges, printers, and other office equipment.

EDUCATION

Suleyman Demirel University | Isparta, Turkey   August 2021 – March 2026
B.S. Computer Engineering , **GPA**: 3.25/4
Relevant Coursework: Web Development, Artificial Intelligence, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming, Data structures and Algorithms

OTHER

2022, 2023, 2024, 2025 Summer Work and Travel Cultural Exchange Program   Delaware/United States
I worked in Delaware, United States, during the summers of 2022, 2023, 2024, and 2025 as part of a student-exchange and cultural exchange program. This role allowed me to enhance my **English proficiency**, develop strong communication skills, and engage with guests and **colleagues from diverse backgrounds.**
